The Liver & Gallbladder Cleanse and Flush is a two-part cleansing protocol: Quick Liver Cleanse capsules (Part 1) and the 2-day Liver Flush (Part 2). One of the most fantastic cleanse protocols of Dr. Hulda Clark’s is the Liver Flush. Please note that you will need to provide your own olive oil and grapefruit juice to complete the 2-day Liver Flush – these items are not included in the kit.

For the best results take the Quick Liver Cleanse capsules for 13 days prior to the Liver Flush. Consider doing a total of five Liver Flushes with a resting period of two weeks between each Flush. Please note that you will need to order more supplies to complete the 2-day Liver Flush multiple times.

If you decide to follow Dr. Clark’s directions herein please keep in mind that although it is best to stay as close to the schedule as possible, if you miss a day or two you can simply pick up where you left off.

If you need help please give us a call for clarification of cleanse directions, but please note that we cannot give medical advice of any sort.

Cleanse Flowchart
The following is a suggested sequence for those completing the full Dr. Clark Purity cleanse protocol.

1. Stay on the weekly ParaZap Cleanse Maintenance Program until the 2-day Liver Flush. Do not take during the 2-day Flush. Continue after the Liver Flush is complete. A minimum of 4 weeks of the Maintenance Program is recommended.
2. Repeat the 2-day Liver Flush 5 times. Wait 2 weeks between each Liver Flush.

*Disclaimer Notice: Our products are not intended to diagnose, treat, cure or prevent any disease. Although some of us or our customers may be interested in the research and statements of Dr. Hulda Clark, this company does not adopt any health or disease related claims based on her work or otherwise. The directions are provided for educational purposes only and should not be treated as a substitute for the medical advice of your healthcare professional. The cleanses are for adults only. We do not recommend anyone under 18 years to go through the cleanses. However, the ParaZap Cleanse may be suitable for children, but only under guidance of a healthcare professional. Interaction with Medication and Other Supplements: If you are taking medications, you should check with your physician or pharmacist before cleansing. You may also search online for: Interaction with Medications and Supplements.*
Frequently Asked Questions

Q: Which cleanse do I do first?
A: Dr. Clark recommended starting with the Digestive Aid Cleanse. It is beneficial to do the ParaZap Cleanse with the Digestive Aid as it will aid in the cleansing process. You can do the Digestive Aid, ParaZap Cleanse, and Kidney Cleanse at the same time. Just remember that these are very potent herbs. If you begin having difficulties taking them together, slow down and take one at a time.

Q: Can I do the Liver Cleanse first?
A: It is never recommended to do the Liver Cleanse before completing all 3 of the other cleanses. The reason for this is if you purge the toxins out of your liver and do not have clear channels of elimination, you run the risk of simply re-circulating the toxins. This can make you very ill.

Q: When do I start the ParaZap Cleanse Maintenance Program?
A: The Maintenance Program starts 7 days after the last day of the ParaZap Cleanse.

Q: Do I stop taking the ParaZap Cleanse Maintenance Program while I am taking the other cleanses?
A: No. Just do not take it during the 2-day Liver Flush.

Q: How often should I do the cleanses?
A: Dr. Clark recommended that everyone take the ParaZap Cleanse Maintenance Program indefinitely. If you decide not to do that, then consider taking it once weekly for 4 weeks minimum. If you take a break, say for about 3 or 12 months, then we recommend you take the 18-Day ParaZap Cleanse before you go back on the once weekly ParaZap Cleanse Maintenance Program. You can always take the 18-Day ParaZap Cleanse a bit faster or in an abbreviated fashion if you have done it before. The biggest benefits you get from the cleanse are always received from the once weekly ParaZap Cleanse Maintenance Program, so stay on it as long as you can. Do the Kidney Cleanse and Liver Cleanse & Flush yearly. Initially do at least 5 liver flushes. The Digestive Aid Cleanse complimented with enzymes should be taken on an as needed basis. Remember also to do the enemas once per year.

Q: What are the side effects of the cleanses?
A: You can expect increased elimination from all of the cleanses. Few people have reported minor flu-like symptoms. If you experience discomfort you should stop taking the supplements and contact your healthcare professional.

Q: How long are the cleanses?
A: The Digestive Aid is 17 days long. The ParaZap Cleanse is 18 days long. The Kidney Cleanse is 21 days. The Liver and Gallbladder Cleanse & Flush is approximately 2 weeks.

Q: Are the cleanses safe for children?
A: Dr. Clark did not recommend any of the cleanses, except the ParaZap Cleanse, be administered to children. We don’t recommend you give the ParaZap Cleanse to your child unless you do so under careful guidance and supervision of your healthcare professional.

Q: Are the cleanses safe for my pets?
A: Only the ParaZap Cleanse can be adapted for pets.

Q: My family members don’t want to take the ParaZap Cleanse, what can I do?
A: Ask your healthcare professional or contact us for the Quick ParaZap Cleanse, it is simpler to take.

Q: I can’t take alcohol tinctures, what can I do?
A: Ask your healthcare professional or contact us for the Para Cleanse with the Freeze Dried GREEN Black Walnut Hull capsules instead of the tincture.

SyncroZap™ Model A11 is now available!
From the makers of the SyncroZap™ — the 1st Zapper brand worldwide.

- 100% compliant with Dr. Hulda Clark’s research
- Available with either wristbands or copper tubes
- Smaller in size but the same robust durability

New features include:
- Pre-programmed frequencies
- One-touch bottle copy mode
- Continuous body zapping mode
- Continuous Zappicator mode

Dr. Clark turned away from zapping with specific frequencies because she found it less effective than other methods. She replaced frequency zapping with plate zapping. The Dr. Clark Store SyncroZap™ uses plate zapping technology – it does not use “smart keys” with frequencies. Dr. Clark did not use those!
Everything you eat, drink, breathe and absorb through your skin is purified and detoxified in your liver. Everyday your body is being polluted by harmful chemicals and what your body doesn’t eliminate ends up getting stored in your body, including inside the liver. Dr. Clark’s Liver & Gallbladder Cleanse and Flush helps lighten the load on your liver and gallbladder with a systematic cleanse that helps maintain your liver’s vitality.

**How does your liver function?**

It is the job of the liver to make bile, 1 to 1 ½ quarts (1 liter to 1 ½ liter) per day. The liver is full of biliary tubes that deliver the bile to the common bile duct. The gallbladder is attached to the common bile duct and acts as a storage reservoir for bile, which aids in the breakdown of proteins and fats. Eating fat or protein triggers the gallbladder to squeeze itself empty after about 20 minutes, and the stored bile finishes its trip down the common bile duct to the intestine.

The biliary tubes in a healthy liver allow the bile to flow with minimum restriction into the common bile duct. The Quick Liver Cleanse capsules and Liver Flush may help you maintain healthier and cleaner bile ducts and thereby continued good flow.

**How Often to Flush?**

This depends on the toxins you eliminate. Initially, you may repeat the Flush at two-week intervals. This allows your organs to get enough rest in between. After your initial Flushes, a quarterly or semi-annual Flush may be enough.

**Cleaning Your Liver**

Your body produces and eliminates waste every second. You can see your body releasing toxins in four different ways, through:

1. Lungs by breathing
2. Skin by perspiration
3. Kidneys by passing urine
4. Large intestine by bowel movements

Your liver is the biggest and most important organ in your body. It has everything to do with how you live - that’s why it’s called the liver. Your liver condition can determine how long you will live and how well you look and feel.

You have two main filters for detoxification. The first one is your liver. Your blood carries nutrients and waste from the digestive system through your liver filter. Your liver breaks down the toxins and absorbs the nutrients. Your blood travels out of your liver, partly clean, into your kidneys, your second main filter.

Your kidneys keep the nutrients in the bloodstream but relieve toxins through urination.

**Too afraid to do the Liver Flush?**

Here are simple ways to gain courage to Flush the liver and gallbladder.

1. **Test how you react to Epsom Salt:**
   - If you have Magnesium Sulfate capsules then take 1 capsule daily and increase dose by 1 capsule per day, until you are taking 15 capsules. If you have Epsom Salt crystals take 1 teaspoon dissolved in ¾ cup cold water and increase daily by no more than 1 teaspoon until you’re taking 3 teaspoons. Do not take more than 3 teaspoons at once.
   - **Stop this practice run when desired!**

2. **Test how you react to Olive Oil:**
   - Take 1 tablespoon of Olive Oil with 1 tablespoon of freshly pressed, cold, grapefruit or lemon juice.
   - Increase by 1 tablespoon daily:
     - **Day 1** - Take 1 tbsp. of oil + 1 tbsp. of juice
     - **Day 2** - Take 2 tbsp. of oil + 2 tbsp. of juice
     - **Day 3** - Take 3 tbsp. of oil + 3 tbsp. of juice
     - **Day 4** - Take 4 tbsp. of oil + 4 tbsp. of juice
   - **Stop this practice run when desired and start the Flush!**

3. **Read about other people’s experiences online:**
   - Google “Liver Flush”

The Dr. Clark Purity brand features our Quick Cleanses, which are more convenient for traveling and people on the go. But for maximum results, use the Original Cleanses, which are more thorough and potent.
Precautions – Please read thoroughly before attempting the Liver Cleanse & Flush

The Liver Flush is generally safe for people in reasonable health and without complicating factors. Consuming fatty foods may carry a comparable risk. Regardless, please adhere to the following precautions. This information is not intended to replace the advice and treatment of a healthcare professional who specializes in the treatment of diseases.

Do not Flush when constipated. Get the bowels moving regularly first. Should you be occasionally constipated, you can take the Dr. Clark Purity Digestive Aid and ParaZap Cleanse, both of which help to regulate the bowels. If you are chronically constipated please consult with your healthcare professional. Once your bowels are moving regularly, for best results, do the Dr. Clark Purity Kidney Cleanse and Quick Liver Cleanse before the Liver Flush. You want your kidneys, bladder and urinary tract in top working condition so they can efficiently remove any undesirable substances absorbed from the intestine as the bile is being excreted.

Do not Flush when ill. Consult with your health professional to get an X-ray and CT scan before doing the Liver & Gallbladder Flush if you suspect you have an obstructed bile duct or gallstones.

Please follow the detailed directions in this kit. If you change these recipes you might expect problems. The liver is quite sensitive. If you plan to make changes, be sure to seek the assistance of a qualified healthcare professional.

Do not take medications, vitamins or supplements that you can do without during the Flush. They could prevent success. Make sure you check with your physician first.

If you are taking medications, please check with your physician prior to the Flush. Ask about known interactions to the items in the Liver Cleanse kit.

The Flush is only for individuals over 18 years of age. Although individual use on the product labels suggests that it can be used for adults and children 12 and over, for safety we do not recommend anyone under 18 years to go through any of the cleanses, except the Dr. Clark Purity ParaZap Cleanse modified for minors.

Do not take during pregnancy or lactation. Keep cleanse items away from children.

Make sure you are able to tolerate Magnesium Sulfate (Epsom Salt) before you attempt the Flush. People unable to tolerate Magnesium Sulfate may suffer a negative reaction, even death. People have died as a result of Epsom Salt overdose. See testing procedures on the previous page – Test how you react to Epsom Salt.

If you experience initial symptoms of hypermagnesemia such as nausea, vomiting, and weakness, discontinue use and contact your doctor.

You will get diarrhea after taking the Epsom Salt. This is a normal reaction. In fact, please contact your healthcare professional if you do not experience diarrhea.

Usage Warning: Consult a healthcare professional before starting this cleanse if taking medication, or if you have a medical condition. Do not take this cleanse if you are pregnant, nursing, or below the age of 18 without consulting with a healthcare professional first. If you have adverse reactions or other symptoms, discontinue taking cleanse and seek advice from a qualified healthcare professional.
Taking the Quick Liver & Gallbladder Cleanse Capsules

Take the Quick Liver Cleanse capsules for 13 days prior to beginning the 2-day Liver Flush. Always take on an empty stomach at least 13 minutes before a meal, or as directed by a healthcare professional. The first day take 1 capsule 3 times daily. From then on take 3 capsules 3 times daily. For best results stay on the ParaZap Cleanse Maintenance Program while taking the Quick Liver Cleanse. After your initial cleanse, a seasonal liver cleanse is recommended.

Preparing for the Liver & Gallbladder Flush

**STEP 1** Schedule 2 days to complete the Liver Flush - Start on a day that allows you to rest the following day.

**STEP 2** Prepare for a zero fat diet – For best results stop eating fat and protein the night before you begin the Flush. On day 1, continue eating a zero-fat breakfast and lunch. For best results, finish eating by 12 PM with only sips of water thereafter. This allows the bile to build up and develop pressure in the liver. Higher pressure pushes out more toxins. Limit the amount of food you eat to the minimum you can get by on. You will purge more toxins if you do.

**STEP 3** Assemble supplies not included in the Liver Cleanse kit
1) Fresh pink grapefruit - 1 large or 2 small, enough to squeeze ½ cup juice. Wash grapefruit twice in hot water and dry before cutting it open. You can substitute lemon juice for grapefruit juice. Squeeze 1 lemon and add enough water to make ½ cup of liquid. Adding natural sweetener is optional.
2) 1 pint (½ liter) jar with lid
3) Make sure you have at least ¼ cup Olive Oil on hand. Light Olive Oil is easier to get down. Choose Extra Virgin Olive Oil because it is cold pressed.
4) Honey (optional for sweetening)

**STEP 4** Organize items on the supply list
1) Pint jar (½ liter) with lid
2) Epsom Salt – 60 capsules Magnesium Sulfate
3) Olive Oil – ⅛ cup
4) Citric Acid – ¼ teaspoon
5) Fresh pink grapefruit (or lemon) – enough to squeeze ½ cup juice
6) Honey – 1 tablespoon (optional)
7) Ornithine – 4 to 8 capsules (don't skip this or you may have difficulty relaxing)
8) Large drinking straw
9) Black Walnut Hull – 1 teaspoon tincture OR 2 capsules
10) Cascara Sagrada capsules
Liver & Gallbladder Flush Schedule

For best results stop eating any fat the night before. For the remainder of the Flush eat no fat and no artificial sweeteners. Fruit and fruit juice are fine. No dairy, butter, oils, meat, eggs, nuts/seeds or sweets. Before you start the Flush read the entire list of precautions.

<thead>
<tr>
<th>Time</th>
<th>Activity</th>
</tr>
</thead>
<tbody>
<tr>
<td>8:00 AM</td>
<td>Eat a no-fat (containing zero fat) breakfast and lunch such as cooked cereal, fruit, fruit juice, bread with preserves or honey (no butter or milk). Oatmeal is the most ideal choice. For lunch eat plain cooked or steamed vegetables with white rice. Do not eat any protein foods such as butter or you might feel ill during the Flush.</td>
</tr>
<tr>
<td>2:00 PM</td>
<td>Do not eat or drink after 2 PM, otherwise you could feel quite ill later. Make sure you have 60 capsules of Magnesium Sulfate (Epsom Salt) handy (you will take 15 capsules per dose for a total of four times per Flush). If you prefer to drink the Magnesium Sulfate dissolved in water, empty the contents of 15 capsules into 3 cups of water in a jar. Add ½ teaspoon of Vitamin C (not included) to the mixture for taste. Store in refrigerator. Makes four servings, ¾ cup each.</td>
</tr>
<tr>
<td>6:00 PM</td>
<td><strong>Dose 1</strong> Take 15 capsules Magnesium Sulfate (or ¾ cup Epsom Salt solution) with no more than ¾ cup water. If you are drinking the Epsom Salt solution you may bite into a lemon or rinse your mouth, but spit out the water. Get the olive oil (ozonated if possible) and grapefruit out if not already at room temperature.</td>
</tr>
<tr>
<td>8:00 PM</td>
<td><strong>Dose 2</strong> Repeat by taking 15 capsules Magnesium Sulfate or ¾ cup of Epsom Salt drink. You haven’t eaten since 2 PM, but you shouldn’t feel hungry. Get your bedtime chores done. The timing is critical for success.</td>
</tr>
<tr>
<td>9:45 PM</td>
<td>Make the grapefruit and olive oil drink</td>
</tr>
<tr>
<td>6:00 AM or Later (next morning): <strong>Dose 3</strong> Upon waking, take 15 capsules Magnesium Sulfate (with no more than ¾ cup water) or ¾ cup of Epsom Salt drink. If you have indigestion or nausea, wait until it is gone before taking the capsules or Epsom Salt drink. Do not take before 6 AM. You may go back to bed.</td>
<td></td>
</tr>
<tr>
<td>2 Hours Later: <strong>Dose 4</strong> Take the last dose of 15 Magnesium Sulfate capsules or ¾ cup of Epsom Salt drink. You may go back to bed again. If you find that you are still constipated after the 3rd or 4th dose of Magnesium Sulfate or Epsom Salt drink, take the Cascara Sagrada capsules as needed.</td>
<td></td>
</tr>
<tr>
<td>After 2 more hours: You may eat. Start with fruit juice. You may add another ½ teaspoon of citric acid to get even more toxins out. Half an hour later eat some fruit. One hour later you may eat regular food but keep it light. Don’t eat too much fruit and avoid sweets. Start with vegetables. By dinner time you should feel recovered.</td>
<td></td>
</tr>
</tbody>
</table>

Expect diarrhea in the morning.
